Summary

Since my collage research scholarship at 2011 I've been coding alongside some project. In 2020 was my launch as a professional IT in Accenture working as a Junior Data Engineer. Just one year after I've became father and started to work as a Software Engineer at XP Inc. starting to have a bigger maturity and vision in the Tech Market. This work made me learn all about Microsoft development technologies (dotNET, C#, SQL, DevOps, Azure). After this job I've worked as a Python Developer and Tech Ops dealing with cloud and java monitoring. I'm searching for an opportunity to continue my development.
